

Service Overview: Human Intelligence

Bizooki's Human Intelligence service enables you to "pay per performance" for large, technical tasks that are otherwise impossible or very complicated for you to perform internally. This low cost, scalable process will allow you to attain efficiency levels unmatched by competitors. Bizooki has a dedicated team of trained workers for your unique projects.

Examples

- Pull contact information from thousands of web sites that meet specified criteria.
- Assign keyword descriptions to a database of photos so that they can be indexed for searching.
- Pull unique metrics for thousands of pieces of web site content and assign topics to measure their performance.
- Flag user-generated content that is inappropriate.
- Identify objects in satellite images.

Benefits

- High accuracy and monitoring process.
- On-site project manager with workers.
- Ability to complete multiple projects simultaneously.

Getting Started
